Summary

Software Engineer with 3+ years building high-throughput event-tracking systems, marketing-attribution dashboards, and automated journey workflows across the full stack. Owned scalable Shopify integrations and server-side Conversion API pipelines processing thousands of events per minute, driving measurable gains in advertiser ROAS.

Experience

BooleanMaths / Medront Datalabs

June 2024 – Present

Software Engineer

Bengaluru, Karnataka

- Architected and shipped end-to-end a live Shopify App (Shopify App Store), spanning OAuth install/onboarding, theme app extensions, webhook listeners, and usage-based billing via the Shopify Subscription API.
- Built a high-throughput event-tracking engine processing 25k+ events/min with RabbitMQ and BullMQ; offloaded client listeners to a WebWorker and bridged browser events to server webhooks, reaching 95%+ attribution coverage.
- Integrated Facebook Ads API, Meta Conversion API (CAPI), and Google Marketing API into server-side pipelines, achieving 9.0+ event match quality and a 20–25% increase in client ROAS.
- Designed a drag-and-drop marketing-automation canvas (Engage) using React Flow for cart-recovery, upsell, and retargeting journeys across WhatsApp, Email, and SMS.
- Built a rule-based Audience Builder that syncs custom cohorts in real time to Meta Custom Audiences, CAPI, and Google Ads to improve targeting precision and campaign order value.
- Developed creative-, product-, and channel-level attribution dashboards (True ROAS) and automated weekly performance-reporting emails to stakeholders.

Torsecure

July 2023 – May 2024

Software Engineer Intern / Consultant

Mangaluru, Karnataka

- Delivered 5+ production websites on the MERN stack, including Branch Selector, ECR Group of Institutions, and the Onyxbnb booking platform.
- Built a personalized assessment platform (IQ and English-proficiency modules) with response-scoring and routing logic for career guidance.
- Deployed serverless architecture on Cloudflare, reducing operational costs and improving performance by ~80%; led SEO audits (Core Web Vitals, schema, sitemaps) to lift indexing and organic traffic.

Connectia Technologies

August 2022 – September 2022

Web Developer Intern

Mangaluru, Karnataka

- Built responsive websites with HTML, CSS, Bootstrap, and PHP, using SQL for database operations, for the Kateel Temple app and Chit Fund Association site.
- Developed and tested employee-maintenance and record-management modules within the MERA management software.

Projects

CommandVault | React.js, Firebase, Google Auth, Tailwind CSS

- Built a collaborative platform for developers to share and organize command snippets using rich text (headings, code blocks), backed by Firebase Realtime Database with Google Auth and live preview.

Trycode Online | React.js, Node.js, Express.js, MongoDB, Docker

- Created a LeetCode-style coding platform on the MERN stack, using Docker containers to safely compile and validate user-submitted code.

MovieDB | React Native, Node.js, MongoDB

- Built a cross-platform mobile app delivering detailed movie information (awards, trends, top-rated, and shows) with a Node.js/MongoDB backend.

Kedar's Collection | React.js, Express.js, Node.js, MongoDB

- Developed a MERN-stack coin-management tool for seamless organization and display of coin collections.

Technical Skills

Languages: JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Remix, React Native, Node.js, Express, Tailwind CSS, Bootstrap, Material UI

Databases: PostgreSQL, MongoDB, ClickHouse, Prisma, Mongoose, Redis

APIs & Marketing: Meta Ads API, Meta Conversion API (CAPI), Google Marketing API, Shopify App / Admin API

Tools & DevOps: Docker, Cloudflare, Linux, GitHub, RabbitMQ, BullMQ, Sentry, Mixpanel
